Education

University of Lagos, Nigeria
2014 – 2019
Bachelor of Science, Computer Sciences

Profile

Hi, I'm Sam! I'm a software developer with over 6 years of experience using Javascript and Javascript tools to build software for web and mobile platforms.
My experience cuts across different industries and I have also worked with different types of teams and practiced multiple software development methodologies.
I enjoy problem-solving and creativity as a person and a developer.

Employment

Senior Frontend Developer - Edurio ULTD   Current

Senior Vue developer responsible for building frontend library in storybook and creating multi-workspaces frontend applications in vue3, migrating from legacy in vue to create Edurio's survey-builder

Software Trainer - SDA (Remote)   2020 – now

Contract trainer at SDA, an online software training academy, where I teach Javascript, HTML and CSS, Java as well as core concepts of programming and software development, also training students in workshops sponsored by companies like Accenture.

Senior Frontend Developer - Qminder (Estonia)   2022 - 2023

Built and maintained UI components using Angular 16 following well-known Angular workflows.
Updated and maintained Qminder software and website with feature improvements and UI migrations.

Senior Frontend Developer - Adcash (Estonia)   2022

Developed and maintained Adcash software as resident senior frontend developer. Migrated software from Vue2 to Vue3. Organised small workshops on Vue framework changes to help level up code quality as a team.

Lead Frontend Engineer - Safaricom (Remote)   2018 - 2021

Led a remote team of 9 frontend developers to build and deploy Safaricom's first self-service portal using Next JS. Set up CI/CD pipeline for 2 separate user-facing dashboards. Handled planning, allocating and reviewing tasks within the frontend team in close collaboration with the project manager.

Frontend Developer - Zinospot
2016 - now

Senior developer at Zinospot where among other projects, I developed the user interface for an online banking platform in Reactjs and TypeScript.

Zinospot also provides services to other finance and banking clients, to develop secure frontend and backend microservices.
